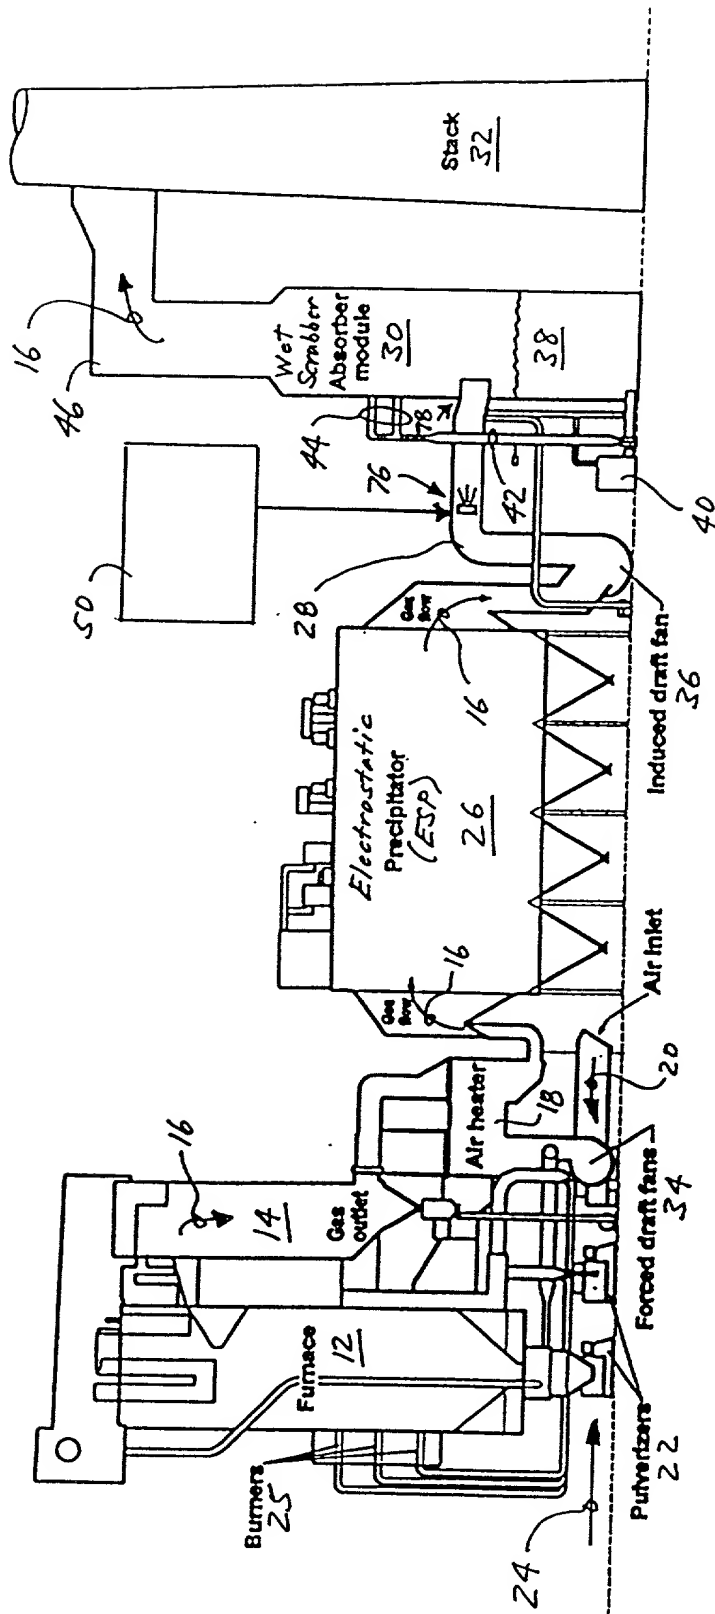

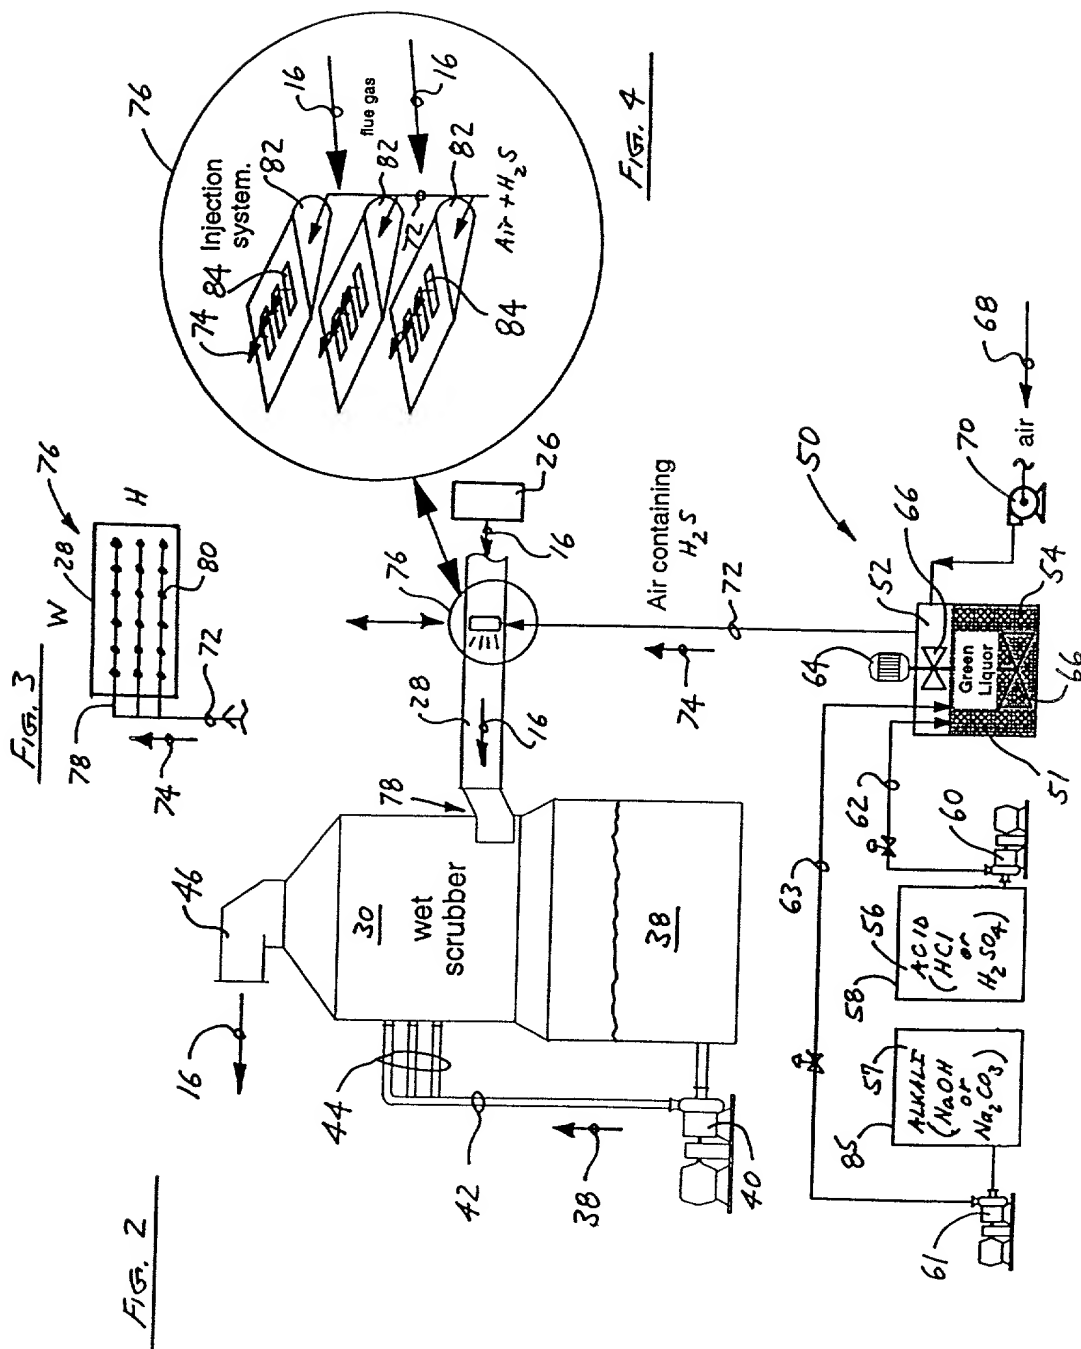

FIG. 1

The chart displays Elemental Hg Concentration (ug/dscm) on the y-axis (0 to 12) against two conditions: Baseline Test without H<sub>2</sub>S and H<sub>2</sub>S Addition. For each condition, the concentrations at WS Inlet and WS Outlet are shown.

| Condition                              | Location  | Elemental Hg Concentration (ug/dscm) |
|--|-----------|--------------------------------------|
| Baseline Test without H <sub>2</sub> S | WS Inlet  | ~2.6                                 |
|  | WS Outlet | ~9.8                                 |
| H <sub>2</sub> S Addition              | WS Inlet  | ~3.4                                 |
|  | WS Outlet | ~2.9                                 |
